

FOR IMMEDIATE RELEASE:

**VIRIDIAN® REACTOR 5™ GREEN LASER
NOW SHIPPING FOR KAHR 9 & 40 PISTOLS**

Minneapolis, MN—August 20, 2014

Viridian continues to lead in green laser technology with the introduction of the first and only green laser sight for Kahr 9mm and .40 S&W polymer framed pistols. Packing the exclusive Viridian Green® 532 nm laser, the breakthrough Reactor® 5 (R5) is up to 50 times brighter than conventional red – visible day or night, indoors or out, in all conditions, at distances no red laser can touch.

With its pistol-matched design, ECR™ Instant-On™ activation, two-color battery level indicator, and included holster, the R5 represents a complete carry package. It maximizes the function of the pistol with virtually no added bulk or weight.

This is the first Reactor® to come with Viridian's new ECR™ Instant-On™ hybrid holster. It's the best of both worlds – strong glass-reinforced nylon shell and comfortable leather combine to make this an exceptional outside-the-waistband belt holster.

ECR™ (Enhanced Combat Readiness®) Instant-On™ feature shuts the laser off while holstered and ignites the laser immediately when drawn, without fumbling with buttons, sliders or unfamiliar grips.

This green laser and holster combination fits all Kahr 9mm and .40 S&W polymer framed pistols (series: P, TP, PM, CW, CM, & CT). The MSRP of \$239 offers a tremendous value.

The industry-leading, most technologically advanced Reactor® product line now consists of the following models:

Model	Description
R5-LCP	Green laser for Ruger LCP
R5-R-LCP	Red laser for Ruger LCP
RTL-LCP	Tactical light for Ruger LCP
