

FOR IMMEDIATE RELEASE:

VIRIDIAN® OFFERS THE BEST VALUE IN LASER SIGHTS WITH THE INTRODUCTION OF THE REACTOR 5™ RED LASER

NOW SHIPPING FOR RUGER LCP, LC9/380, AND S&W SHIELD!

Minneapolis, MN—March 24, 2014

Viridian's extraordinary Reactor™ 5 is the industry's most advanced green laser sight, in the world's smallest frame, specifically designed for concealed carry pistols. Viridian now offers the Reactor in red laser (R5-R), making it the best value in laser sights.

"We wanted to offer shooters all of the quality and state-of-the-art technology that the Reactor provides at an unbeatable price." says Viridian President Brian Hedeem. "That's exactly what we did. Elite Red laser, ECR Instant-On technology, a 2-color battery level indicator, and a holster for the MSRP of \$129!"

The Viridian exclusive Elite Red™ 635 nm laser provides the brightest red laser on the market today. This wavelength generates the sharpest red dot possible for more positive targeting, higher accuracy, and stronger intimidation.

The R5-R is currently available for the Ruger LCP, Ruger LC9/380, Smith & Wesson M&P Shield, and all Kahr polymer framed pistols in 9, 40, and 45. Look for Reactor fits for popular models by Glock, Sig, and Springfield later this year.
